<u>**Week 7 Research Assignment:**</u>

What are 3 HTML elements not mentioned any of the video this week? What do they do and how are they used?

1. <article> is a self-contained composition intended to be independently distributable or reusable. This can be a forum post, magazine or newspaper article, blog entry, product card, user-submitted comment, interactive widget, or any other independent item of content.
2. <audio> is used to embed sound content into documents.
3. <embed> embeds external content at the specified point in the document. This could be content provided by an external application or other source of interactive content like a browser plug-in.

What is your favorite thing you learned this week?

> This week I am seeing the applications to start building a website which is my main reason for taking this coding bootcamp. My main goal is to build a website for my restaurant/bar. I'm excited to use my new skills to get started on my website creation.
